Introduction

Simple, flexible aluminium folding grille and closure systems providing imaginative options for a wide range of shopfront entrances and space delineators.

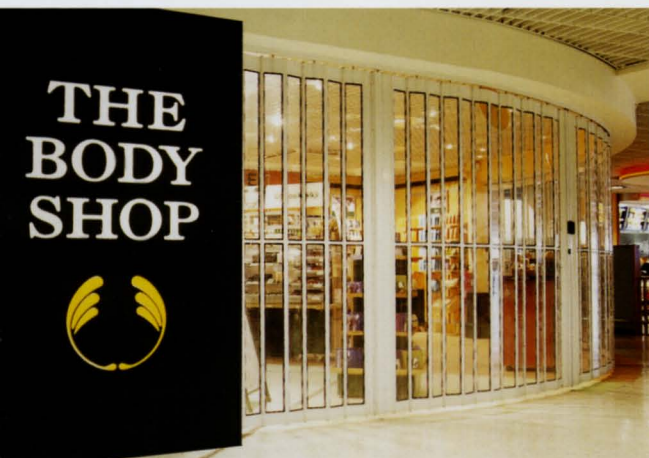

With our commitment to "Quality-On-Time", most standard orders are available in 10 days. We provide total service nationwide, directly and through our dealer network.

All our products are custom-built to suit individual customer requirements. Call us today for more details.

Royal folding closures on four levels at Bentalls in Kingston.

Simplicity

Royal - 3 mm thick tempered glass panels. This high performance model offers excellent visibility and exceptional protection. Perfect for any application requiring maximum visibility and secure closing.

Suspended from a continuous overhead track, the closures are easily operated single-handed, even in very large spans. Gliding smoothly from side to side, either stacking in-line or remotely, clear of the entrance, these are the most compact folding closures available on the market.

Flexibility

Aeroflex - The micro-perforated steel panels allow some airflow together with a degree of transparency.
Global - With full height solid aluminium panels.

With our selection of stock straight and curved sections together with our ability to form any special curves to a 356 mm minimum radius, it is possible to follow any curve or profile. Ideal for faceted shopfronts, bar tops etc. in continuous, uninterrupted single spans.

The flexibility and mobility of our folding products provide limitless options for imaginative design layouts to suit any shape or length.

Benefits

Only 42 mm headroom is needed for the top track, and there are no floor tracks. There are no removable mullions or posts to contend with since all the lock members and other components are integrated.

All our folding grille and closure systems are surprisingly lightweight, reducing the need for expensive and elaborate overhead supporting structures.

System S12 - Distinctive, rugged and durable, it combines some of the strength of the Concept model with the lightweight appearance of the S126.

Concept 99 - With a choice of four different patterns, this attractive open-style grille is cost-effective and rugged.

Available with manual slide-aside operation only, there are no costly motors, winches or springs to break.

Our folding systems require no scheduled servicing and they are virtually maintenance-free. Cost-effective, great value in an attractive choice of models.

Quality - On - Time

We are committed to providing professional advice by resourceful consultants—quickly and efficiently. Give us the problem and we will provide simple, effective proposals with design or layout drawings and product selections. We guarantee delivery within two weeks of final sizes confirmation, and can install anywhere. Allow a few extra days for freight forwarding to other countries.

Our worry-free after-sales service, commitment to ongoing improvement and unrivalled range of products has helped us maintain our reputation as market leader.

***Impact** - polycarbonate glazed panels provide remarkable impact resistance in a surprisingly light model.*

Design Choice

***System S126** - A lightweight, discreet folding grille.*

With eleven different standard models to choose from, we have products to suit almost every indoor application. They include glazing with tempered glass or Lexan polycarbonate transparent sheets, solid aluminium panels, micro-perforated steel sheets or seven different grille patterns.

Available in any length or shape, most models can be supplied up to 4000 mm high.

Applications

Widely specified for use in enclosed retail and public environments, including retail malls, airport terminals, superstores, in-store concessions, countertops & bars, bank lobbies & ATM areas, kiosks, railway stations, ferries, ports, marinas, museums, schools and public buildings—in fact, wherever people and space need to be separated by a simple, secure screen system.
